## Nurse Call Handsets

### affordable & functional

The main advantage of a Zalom handset is that it can be configured to match any existing nurse call system quickly and efficiently. In fact, the handset itself often costs less than the costs associated with the repairs on a faulty handset in an existing system. It is without a doubt an ideal choice and long-term investment. This handset has all the functions you would expect from a modern, multi functional unit. The Zalom handset can increase the utility of an existing system by adding multiple functions, such as the ability of the user to switch the TV on and off, change the channel, alter the volume and control lighting in the room at his or her own pleasure.

### features

- 100% Australian designed and manufactured product
- Configurable with any existing system
- Affordable
- Inexpensive to repair – can be repaired without specialist tools
- Ergonomically efficient (rests comfortably in hand, large buttons, clear symbols, smooth corners and a slightly textured surface to reassure grip)
- Easily cleaned or disinfected
- Robust (resistant to impacts such as being dropped on hard floors)
- Reliable
- Water resistant

## System Overview

### the heart of the call system

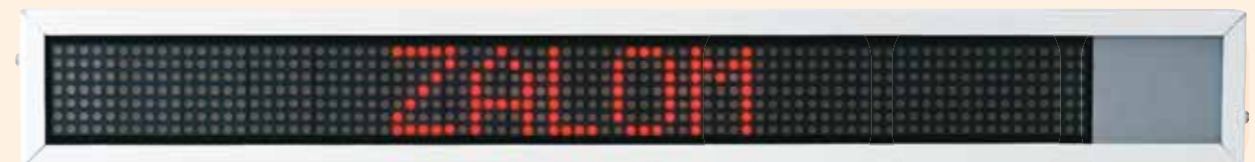

The Call Master Digital Call System is a revolutionary product bringing the ultimate in call monitoring for Nurse Call, Cardiac, Emergency and Disabled WC Systems. The heart of the Call Master is it's easy 'Icon' based front screen, which can run on any PC using a Microsoft Windows Operating System and requiring **NO** special electronics or interface cards. The product has been designed to make it very clear and easy for users to understand. You will find our range of soft touch call units corresponding with the Call Master program which will ensure every call is dealt with, without confusion.

### advanced call alert

The paging interface allows all calls in the Call Master to be sent immediately to the pagers on each system. Furthermore, with the use of our intelligent display you are able to see each call wherever you may be. This up to date display is addressable with eight multi-tone alerts and colour category features.

Call Master also has a grouping option for calls. In other words, you are able to assign **ANY** of the 500 programmed buttons on each system to one of ten assigned intelligent displays.

All handset models available in white & cream. Membrane switches can be ordered in any colour configuration including background colour.
